

Diminishing Returns WADD: a concave theory of multi-attribute choice

H1 · Model discrimination

concave						WADD
A	5	5	4	0	12.0	14
B	4	4	3	2	14.5	13
B-A					+2.5	-1
concave						Tallying
A	3	3	3	0	8.3	3
B	2	2	2	3	10.3	1
B-A					+1.9	-2
concave						TTB
A	5	2	1	0	7.6	5
B	4	1	2	1	9.5	4
B-A					+1.9	-1

H2 · Steep-vs-flat

steep flat concave						linear
A	2	0	5	2	8.3	9
B	2	1	4	2	10.2	9
B-A					+1.9	0
steep flat concave						linear
A	0	3	3	5	10.3	11
B	1	3	3	4	12.2	11
B-A					+1.9	0

H3 · Diminishing preference

steep region concave						linear
A	2	0	1	0	3.0	3
B	2	2	1	2	10.0	7
B-A					+7.0	+4
flat region						
A	5	3	4	3	15.0	15
B	5	5	4	5	16.5	19
B-A					+1.5	+4

Annotations: A green arrow labeled '+3 shift' points from the steep region to the flat region. A red dashed arrow labeled 'shrinks' points from the steep region's B-A difference (+7.0) to the flat region's B-A difference (+1.5). A blue dashed arrow labeled 'invariant' points from the linear model's B-A difference (+4) in the steep region to the linear model's B-A difference (+4) in the flat region.
